OBJECTIVE

Entry-level Software / IoT Developer with hands-on experience in Android application development, embedded systems, and IoT automation. Seeking opportunities to build scalable software systems while strengthening problem-solving, system design, and backend fundamentals.

TECHNICAL SKILLS

Programming Languages: Java

Mobile Development: Android (Java)

Web Technologies: HTML, CSS, JavaScript

IoT & Embedded: ESP32, ESP8266, Sensors, Relays

Tools: Android Studio, Arduino IDE, Git

Core Concepts: OOP, Data Structures Basics

EXPERIENCE

Full Stack Developer – RABNEX Innovation
India

October 2025 – Present

- Designed and developed IoT-based automation solutions using ESP32/ESP8266 microcontrollers.
- Integrated Android applications with IoT hardware for real-time monitoring and control.
- Worked on complete development lifecycle including hardware interfacing, firmware logic, and deployment.
- Collaborated with team members to deliver scalable and maintainable smart system solutions.

IoT Development Intern – Robota Classroom & Solutions **April 2023 – May 2023**
Pune, Maharashtra

- Developed and tested IoT projects focused on smart automation systems.
- Gained hands-on experience with sensors, embedded boards, and hardware debugging.
- Assisted in improving reliability and performance of IoT prototypes.

PROJECTS

Smart IoT Fingerprint Door Lock System

- Built an IoT-based door lock using ESP32, relay module, and solenoid lock.
- Implemented mobile app-based authentication and real-time control.

Automatic Rain Sensing Car Wiper Using IoT

- Developed an IoT-based system to automate car wipers based on real-time rain detection.
- Enhanced driver safety and convenience through smart sensor integration.

PMPML Online Ticket Application

- Developed an online ticket booking application for PMPML buses in Android.
- Streamlined the commuter experience with digital ticketing solutions.

EDUCATION

Bachelor of Engineering (Information Technology)

Sep 2024 – June 2027

Dr. D. Y. Patil Technical Campus, Varale Talegaon

Diploma in Computer Engineering

June 2021 – May 2024

Marathwada Mitra Mandal Polytechnic

EXTRA-CURRICULAR & LEADERSHIP

- Participated in Smart India Hackathon 2025(Finalists) as part of Team QuantumSparks, developing a handheld radio with satellite tracking system (Hardware category).
- Coordinated and contributed to college-level technical and project-based activities.
- Actively involved in building and experimenting with IoT and embedded systems projects.
- Participated in technical learning activities related to Android development and automation.
- Experience working in small teams and startup-like environments.
